Deployment Roadmap

1 Install Prerequisites

Ensure .NET 9 SDK and Visual Studio 2022 are installed.

2 Project Initialization

```
{ mkdir NotesApp && cd  
NotesApp }
```

Copy project files and run `dotnet restore` to download NuGet packages.

3 Database Activation

Configure your string in `appsettings.json` and apply migrations:

```
{ dotnet ef database update }
```

 **Security Check:** Password hashing and Anti-forgery tokens are enabled by default in this configuration.
